

# NO **3RD** TULLA RUNWAY

## It's a health hazard for us all!

Melbourne Airport is calling for public feedback on their Major Development Plan for a proposed 3rd Runway. Lets discuss the downsides!

### Too much noise

Aircraft noise is damaging to health, wellbeing, learning and cognitive function and the 3rd runway will increase Melbourne Airport flight movements by 55%.

- **Unlimited in their loudness** imposed on residents
- **Unlimited day and night** with no caps or curfew
- **Unburdened by the necessity to compensate** adversely affected residents.

### Way too warming

Right when urgent and massive emissions cuts are required, the 3rd runway will enable increased flight emissions of 16 million tonnes CO<sub>2</sub>-e a year

- **More warming than AGL Loy Yang**, Australia's dirtiest power station,
- **Exceeding Victorian reduction target** of 50% by 2030 and
- **Breaching Federal reduction target** of 26-28% by 2030.

### Loss of woodland

- Nationally protected habitat will be clear felled.
- Any proposed compensating offsets are likely to be ineffective.

### Dodgy economics

- The 3rd Runway Plan overstates the economic benefits.
- Its flight demand assessment is delusional.
- Increasing emissions doesn't align with investor sentiment.

### Lack of transparency

- The 3rd Runway Plan under-reports the global warming it will enable.
- It under-reports the impact severity of those emissions
- It ignores risks to airport passenger growth forecasts.
- It expects an unprecedented simultaneous approval with the Master Plan.

## Here's how we can stop it.

### Object now

Go to [http://www.no3rdtullarunway.net.au/portfolios/object\\_now/](http://www.no3rdtullarunway.net.au/portfolios/object_now/)

Members of the public have until Friday 13 May 2020 to submit responses, objections and feedback to the Major Development Plan.
