

# STOP **55%** EMISSIONS GROWTH!

## No 3rd Runway at Melbourne Airport

### Way too warming

Right when the climate emergency requires urgent and massive emissions cuts, we calculate a 3rd runway will enable a 55% increase in Melbourne Airport flight emissions — to 16 million tonnes CO<sub>2</sub>-e a year.

- **As warming as AGL Loy Yang**, Australia's dirtiest power station (see <http://www.no3rdtullarunway.net.au/portfolios/way-too-warming/>)
- **Massively breaching Victoria's reduction target** of 50% by 2030 and the **Federal reduction target** of 26-28% by 2030.

## Here's how we can stop it

### Object now

Members of the public have until Monday 16 May 2020 to submit responses, objections and feedback to the Major Development Plan.

Go to [http://www.no3rdtullarunway.net.au/portfolios/object\\_now/](http://www.no3rdtullarunway.net.au/portfolios/object_now/)

### Become a supporter

If you work for or are a member of a climate action group, why not sign them up as a campaign supporter?

Go to <http://www.no3rdtullarunway.net.au/portfolios/become-a-supporter/>

### Sign the petition

Petition #1: Stop the proposed Third Runway at Melbourne Airport petition

Petition #2: Undertake independent EIS and a Health Impacts Assessments petition

Go to <http://www.no3rdtullarunway.net.au/portfolios/sign-the-petition/>

### Divest your super fund

IFM Investors, owned by more than 20 industry super funds, has a 25% shareholding in Melbourne Airport
